Fire Warning Safety Precautions for Plastic Belting

Ashworth's hybrid belts and plastic belts contain thermoplastic components that can burn. If exposed to an open flame or to temperatures above stated specifications, belts may decompose and emit toxic fumes. Do not expose plastic belts to extreme temperatures or to an open flame. Additionally, these belts should NOT be used following any process, such as an oven, where products could be ignited before being placed on the belt. Refer to the appropriate Material Safety Data Sheet for other precautions and emergency response information.

* Applicable to The Advantage, Hybri-Grid[®], Omni-Lite[®], Prestoflex[®], ChemGuard[™] Prestoflex[®], HD Tote Chain[™], KPA, KRM, Rectangular Series, SpiralFlow and SpiralSurf products.
